

StoveTop FireStop

PLUS SENSOR (S)

- Sensor technology constantly monitors the cooking surface, and deploys within seconds of detecting a fire.
- Omnidirectional ramp for broader coverage of the cooking surface
- Automatic suppression
- Stylish new design
- One pair protects a typical residential, 4-burner stove
- Simple, magnet-based installation
- 6-year effective life
- For residential, indoor kitchens
- No maintenance or inspections needed

STFS PLUS S

StoveTop FireStop Plus Sensor (STFS Plus S) features an array of embedded sensors that monitor a stove's cooking surface for the specific signature of a grease fire. When a fire is detected, the unit deploys within seconds, suppressing the fire below.

STFS Plus S also features the improved styling, enhanced powder delivery mechanism, and increased functional range of STFS Plus.

Simply attach the pre-installed magnet to the top of your ventilation hood or cabinetry* above the stove.

**Non-magnetic surfaces require the Adhesive Mounting Kit*

ADHESIVE MOUNTING KIT

Mounting Kit for non-magnetic surfaces over the stove.

STFS / **PLUS S**®

One night back in 1972, our company's founders were attending a neighborhood block party when they overheard someone talking about a recent grease fire. The neighbor stated, "I got distracted and left the stove on. Sure, I had a fire extinguisher and baking soda in the fridge. But since I wasn't in the kitchen to use them, neither did me any good!" Hearing this story became a revelation, and launched the design of the simple, automatic fire suppressor that is today known as StoveTop FireStop.

PROVIDING SIMPLE, AUTOMATIC COOKING FIRE SUPPRESSION IS SOMETHING WE TAKE VERY SERIOUSLY.

StoveTop FireStop has protected individuals and families from the deadly effects of cooking fires since 1972, and we want to do the same for you and your family.

Originally founded in 1963 by Bob and Della Williams, the company now known as WilliamsRDM has a knack for solving complex problems with simple solutions.

MODEL COMPARISON FOR VENTHOOD PRODUCTSUT

	Rangehood	STFS Plus	STFS Plus Sensor
PART NUMBER	675-3	679-3	679-S-3
AUTOMATIC	Works automatically. Suppresses fires even when no one is in the kitchen		
FUNCTION	Powder is released onto fire only with direct, sustained contact with a flame		Powder released when dangerous conditions detected
ALERT	Makes a "POP!" sound upon activation		Emits a loud, audible tones like a smoke detector
UNIT OF SALE	Sold by the pair to protect a residential, four-burner cooktop		
EFFECTIVE LIFE	Cooking fire protection for up to six (6) years		
HOOD TYPE	Protects kitchens with traditional range hoods above the cooking surface	Protects kitchens with flush-bottom or decorative hoods above the cooking surface	
CLEARANCE	27-35 inches	15-32 inches	22-32 inches
POSITIONING	Position each canister at the midpoint between the center of the front and back burner on each side of cooktop surface		
MOUNTING*	Attaches by a pre-installed magnet to underside of ventilation hood		
NOTES	We invented the technology, and have been the market leader for over 40 years	New omnidirectional ramp increases powder distribution on the cooking surface	Detects the fire sooner, suppressing before it gets out of control.
	Invisible – canisters disappear in the recess of the range hood	Improved design should help in blending with your designer hood's finish	

* Alternative mounting kits available for purchase online.
