

# STOVETOP FIRESTOP LOWPRO®

Stovetop Firestop® LowPro® represents the next generation of StoveTop FireStop designed to be concealed under the microwave or a modern flat-bottom ventilation hood.

LowPro is easy to mount under the microwave. Each of four arms can swivel to avoid lights and vents

Our new ramp systems delivers all of the powder to fire or burner.

## The NEWEST PRODUCT FROM STOVETOP FIRESTOP

Stovetop FireStop LowPro  
P/N: 691-1A

- Stylish design to mount under microwaves, or modern, flat-bottom ventilation hoods
- Magnet arms swivel to make installation easy
- New ramp can pivot forward or backward to deliver powder directly to the fire in the pan on either burner
- Vertical clearance: 15-32" between the mounting point and the cooking surface
- Automatic activation by direct contact with a sustained flame
- Each pair protects a typical residential, 4-burner stove
- No maintenance or inspections needed
- 6-year effective life

One night back in 1972, our company's founders were attending a neighborhood block party when they overheard someone talking about a recent grease fire. The neighbor stated, "I got distracted and left the stove on. Sure, I had a fire extinguisher and baking soda in the fridge. But since I wasn't in the kitchen to use them, neither did me any good!" Hearing this story became a revelation, and launched the design of the simple, automatic fire suppressor that is today known as StoveTop FireStop.

**PROVIDING SIMPLE, AUTOMATIC COOKING FIRE SUPPRESSION IS SOMETHING WE TAKE VERY SERIOUSLY.**

StoveTop FireStop has protected individuals and families from the deadly effects of cooking fires since 1972, and we want to do the same for you and your family.

Originally founded in 1963 by Bob and Della Williams, the company now known as WilliamsRDM has a knack for solving complex problems with simple solutions.
