

STFS POTASSIUM BICARBONATE

North America EN
SDS No.: W202511

Rev Date: 01-Dec-2025
Rev Num: 11

SECTION 1. CHEMICAL PRODUCT / COMPANY IDENTIFICATION

Company Identification:	WilliamsRDM, Inc. 500 Winscott Road Fort Worth, TX 76126
24-Hour Emergency Telephone Number:	1-800-535-5053 (Infotrac)
To Request an SDS:	MSDS@stfs.com, 1-888-616-7976
Customer Service:	1-888-616-7976
Product Identifier:	PN: 675-17 Powder Mix, PB Base
Trade Name:	Potassium Bicarbonate USP ACS and Technical Grades Potassium Bicarbonate Food Grade
Synonyms:	Carbonic acid, monopotassium salt; KBC; Pot bicarb; Potassium acid carbonate; Anhydrous potassium bicarbonate; Potassium hydrogen carbonate
Product Use:	Potassium bicarbonate is used as an agriculture soil treatment, anti-scaling agent, catalyst, adsorbent and absorbent, anti-freezing agent, binding agent, cement additive, cosmetic products (hair and skin care), corrosion inhibitor, deicer, detergent builder (washing powder and dishwasher tabs), flame retardant (fire extinguisher ingredient), food additive (baking agent, color preservative, nutrient supplement, processing aid), feedstuff additive, fertilizers, foaming / blowing agent (high-temperature polymer blowing agent, raising agent), filler, fixing agent, flotation agent, impregnation agent (for paper or cellulose), laboratory chemical, leavening agent, chemical intermediate, odor agent, oil drilling, pH regulating agent (e.g. buffer), pharmaceutical substance (processing aid and preparations), photo-chemical, plant protection agent, reagent in chemical synthesis, separating agent, tanning agent (for leather), used in aqueous coatings and adhesives, washing and cleaning products, water treatment, polymer compounds, toners paints and inks
Restrictions on Use (United States):	If a food grade flow aid is required in product, care must be taken to ensure it is approved for food use. Contact WilliamsRDM for advice.
Other Global Restrictions on Use:	Other restrictions on use based on local, regional, state, or national regulations may exist and must be determined on a case-by-case basis.
Note:	-USP Grade potassium bicarbonate meets both the U.S. Pharmacopoeia and FDA chemical standards for use in drug products -ACS Grade potassium bicarbonate meets the chemical requirements set by the American Chemical Society for reagent quality chemicals -Technical Grade potassium bicarbonate is designed to meet the requirements of technical grade applications with a flow aid.

POTASSIUM BICARBONATE**SDS No.:** W202511**Rev Date:** 01-Dec-2025**Supercedes Date:** 15-Apr-2015**Rev Num:** 11

SECTION 2. HAZARDS IDENTIFICATION

OSHA REGULATORY STATUS: This material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

EMERGENCY OVERVIEW

Color:	White
Physical State:	Solid
Appearance:	Granular, Powder
Odor:	Odorless
Signal Word:	Non-hazardous

MAJOR HEALTH HAZARDS: MAY CAUSE MILD EYE, SKIN, AND/OR RESPIRATORY TRACT IRRITATION. MAY BE HARMFUL IF SWALLOWED IN LARGE QUANTITIES.

PRECAUTIONARY STATEMENTS: Call a POISON CENTER or doctor if you feel unwell.

ADDITIONAL HAZARD INFORMATION: Good hygiene and safety practices should be used when handling and working with this material. Good hygiene practices include but are not limited to wearing suitable chemical resistant gloves; eye protection; washing hands and affected skin immediately after handling, before breaks, and at the end of the workday; regularly cleaning work area and clothing; etc.

HAZARD CLASSIFICATION:

Note: This material is not classified as hazardous according to OSHA HAZCOM 2012 (29 CFR 1910.1200). This material is not classified as hazardous according to WHMIS 2015 as updated by the Hazardous Product Act (HPA) and the Hazardous Products Regulations (HPR).

HAZARDS NOT OTHERWISE CLASSIFIED (HNOC):	- ACUTE TOXICITY - ORAL: Category 5 (May be harmful if swallowed)
---	---

POTASSIUM BICARBONATE

SDS No.: W202511

Rev Date: 01-Dec-2025

Supercedes Date: 15-Apr-2015

Rev Num: 11

GHS SYMBOL: None

GHS SIGNAL WORD: WARNING

GHS HAZARD STATEMENTS:

GHS - Physical Hazard Statement(s)

- None

GHS - Health Hazard Statement(s)

- None

GHS - Environmental Hazard Statement(s)

- None

Additional Hazards - GHS Hazards Not Otherwise Classified (HNOC):

- ACUTE TOXICITY - ORAL: Category 5 (May be harmful if swallowed)

GHS - Precautionary Statement(s) - Prevention

- There are no Precautionary Statement(s)-Prevention phrases assigned

GHS - Precautionary Statement(s) - Response

- There are no Precautionary Statement(s)-Response phrases assigned

GHS - Precautionary Statement(s) - Storage

- There are no Precautionary-Storage phrases assigned

GHS - Precautionary Statement(s) - Disposal

- There are no Precautionary Statement(s) - Disposal phrases assigned

Physical Hazards of Significance Not Mentioned in GHS Classification

- No physical hazards were identified for this product; therefore, no physical hazard statements were assigned

See Section 11: TOXICOLOGICAL INFORMATION

POTASSIUM BICARBONATE**SDS No.:** W202511**Rev Date:** 01-Dec-2025**Supercedes Date:** 15-Apr-2015**Rev Num:** 11**SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS**

Component	Systematic Chemical Name	Common Name	CAS Number	Percent [%]
Potassium Bicarbonate			298-14-6	97.5-100
Potassium Carbonate			584-08-7	<2.5

SECTION 4. FIRST AID MEASURES

EYE CONTACT: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

SKIN CONTACT: If skin irritation persists, get medical advice/attention.

INHALATION: IF INHALED: Call a POISON CENTER or doctor if you feel unwell.

INGESTION: Call a POISON CENTER or doctor/physician if you feel unwell.

Most Important Symptoms/Effects (Acute and Chronic [Delayed]):

Acute Symptoms/Effects:

Eye: Eye Irritation: Eye exposure may cause irritation, and redness to the eye lids, conjunctiva.

Skin: Skin Irritation: Exposure to skin may cause redness, or irritation. This material when applied to the skin of guinea pigs did not elicit any dermal sensitization reaction.

Inhalation (Breathing): Respiratory Irritation: Upper airway irritation, may cause cough, redness of mouth and upper airways.

Ingestion (Swallowing): No effects identified.

Chronic (Delayed) Symptoms/Effects:

No delayed / chronic effects have been identified.

Protection of First-Aiders: Avoid contact with skin and eyes. Do not breathe dust.

Notes to Physician:

This material dissociated into potassium and bicarbonate ions upon contact with water.

Interaction with Other Chemicals Which Enhance Toxicity: None known.

POTASSIUM BICARBONATE**SDS No.:** W202511**Rev Date:** 01-Dec-2025**Supercedes Date:** 15-Apr-2015**Rev Num:** 11

Medical Conditions Aggravated by Exposure: No information available.

SECTION 5. FIRE FIGHTING MEASURES

Fire Hazard: Product itself is non-combustible.

Explosive properties: This product is not combustible or explosive. May decompose under fire conditions emitting carbon dioxide.

Extinguishing Media: Use extinguishing agents appropriate for surrounding fire. the product is not combustible. In case of fire in the surroundings, use water spray, foam, CO₂, dry powder.

Unsuitable Extinguishing Media: High volume water jet.

Specific Hazards: Combustion products may include carbon oxides or other toxic vapors. Thermal decomposition can lead to release of irritating gases and vapors.

Unusual Hazards: High temperatures due to fire or mixing with acids can cause this material to decompose releasing carbon dioxide gas.

Fire Fighting: Move container from fire area if it can be done without risk. Avoid inhalation of material or combustion by-products. Stay upwind and keep out of low areas.

Advice for Firefighters: Water used to extinguish fire should not enter drainage systems, soil, or stretches of water. Ensure there are sufficient retaining facilities for water used to extinguish fire. Contaminated fire-extinguishing water must be disposed of in accordance with the regulations issued by the appropriate local authorities. Fire residues should be disposed of in accordance with the regulations.

Hazardous Combustion Products: Oxides of carbon; Potassium oxides; Heating above 100 °C may cause dangerous levels of carbon dioxide gas to be present in the atmosphere

Products Formed During Combustion and Thermal Degradation: When heated to decomposition emits toxic fumes of potassium oxide (K₂O)

Sensitivity to Mechanical Impact: Not sensitive.

Sensitivity to Static Discharge: Not sensitive.

Lower Flammability Level (air): Not flammable

Upper Flammability Level (air): Not flammable

Flash point: Not flammable

POTASSIUM BICARBONATE

SDS No.: W202511

Rev Date: 01-Dec-2025

Supercedes Date: 15-Apr-2015

Rev Num: 11

Auto-ignition Temperature: Not flammable

Physical Hazards of Significance Not Mentioned in GHS Classification

- No physical hazards were identified for this product; therefore, no physical hazard statements were assigned

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions: Avoid dust formation. Avoid breathing dust. Avoid contact with skin and eyes. Wash thoroughly after handling.

Personal Protective Equipment: Cleanup personnel must wear proper protective equipment. See Section 8 for information on personal protective equipment.

Emergency Procedures: Restrict access to the area until cleanup is complete. Prevent material and runoff from entering sewers and waterways if it can be done safely well ahead of the release.

Environmental Precautions: Keep out of water supplies and sewers. Releases should be reported, if required, to appropriate agencies.

Methods and Materials for Clean-up

Recovery: Shovel dry material into suitable container. Avoid dust formation.

Neutralization: Wash away remainder with plenty of water.

Final Disposal: Recycle or dispose according to regulations. For waste disposal, see section 13.

SECTION 7. HANDLING AND STORAGE

HANDLING:

Precautions for Safe Handling: Avoid breathing dust. Wash thoroughly after handling. Handle in accordance with good industrial hygiene and safety practice. When using, do not eat, drink or smoke. Do not reuse containers. Wear personal protective equipment as described in Exposure Controls/Personal Protection (Section 8) of the SDS.

Precautions for Safe Handling: .

Technical measures/precautions: No information available.

Prevention of contact: Avoid contact with incompatible materials.

POTASSIUM BICARBONATE

SDS No.: W202511

Supercedes Date: 15-Apr-2015

Rev Date: 01-Dec-2025

Rev Num: 11

STORAGE:

Safe Storage Conditions: Store and handle in accordance with all current regulations and standards. Keep container tightly closed and properly labeled. Material is very hygroscopic. Store in a cool, dry area. Keep separated from incompatible substances (see below or Section 10 of the Safety Data Sheet).

Technical measures: Refer to Sections 6 and 10 for additional information.

Incompatible Substances: Lime. Acids. Prolonged contact with aluminum, brass, bronze, copper, lead, tin, zinc or other alkali sensitive metals or alloys.

Packaging or Materials of Construction: Consider incompatible materials when selecting materials for packaging or materials of construction. Protect from damage and keep separated from incompatible substances.

Physical Hazards of Significance Not Mentioned in GHS Classification

No physical hazards were identified for this product; therefore, no physical hazard statements were assigned

SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

REGULATORY EXPOSURE LIMIT(S):

This product would be regulated as a nuisance dust (Particles Not Otherwise Specified (PNOS)).

OEL: Occupational Exposure Limit; **OSHA:** United States Occupational Safety and Health Administration;

PEL: Permissible Exposure Limit; **TWA:** Time Weighted Average; **STEL:** Short Term Exposure Limit

NON-REGULATORY EXPOSURE LIMIT(S):

Listed below are the product components that have advisory (non-regulatory) occupational exposure limits (OEL's) established.

- The Non-Regulatory United States Occupational Safety and Health Administration (OSHA) limits, if shown, are the Vacated 1989 PEL's (vacated by 58 FR 35338, June 30, 1993).
- The American Conference of Governmental Industrial Hygienists (ACGIH) is a voluntary organization of professional industrial hygiene personnel in government or educational institutions in the United States. The ACGIH develops and publishes recommended

POTASSIUM BICARBONATE

SDS No.: W202511

Rev Date: 01-Dec-2025

Supercedes Date: 15-Apr-2015

Rev Num: 11

occupational exposure limits each year called Threshold Limit Values (TLVs) for hundreds of chemicals, physical agents, and biological exposure indices.

ENGINEERING CONTROLS: Use closed systems when possible. Provide local exhaust ventilation where dust or mist may be generated. Ensure compliance with applicable exposure limits.

PERSONAL PROTECTIVE EQUIPMENT:

Eye Protection: If eye contact is likely, wear chemical resistant safety goggles. Where splashing or spraying is possible, use a face-shield in addition to chemical protective goggles.

Skin and Body Protection: When potential for contact with dry material exists, wear disposable coveralls suitable for dust exposure, such as Tyvek®. When potential for contact with wet material exists, wear Tychem® or similar chemical protective suit. Contaminated clothing should be removed and laundered before reuse.

Hand Protection: Wear appropriate chemical resistant gloves. Consult a glove supplier for assistance in selecting an appropriate chemical resistant glove.

Protective Material Types: Neoprene. Nitrile. Butyl rubber. Natural rubber.

Respiratory Protection: A NIOSH approved respirator with high efficiency particulate air (HEPA) cartridges may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits, or when symptoms have been observed that are indicative of overexposure. When an air-purifying respirator is not adequate for spills and/or emergencies of unknown concentrations, an approved self-contained breathing apparatus operated in the pressure demand mode is required. A respiratory protection program that meets 29 CFR 1910.134 must be followed whenever workplace conditions warrant use of a respirator.

Other Protective Equipment: An emergency eyewash fountain and quick drench shower is recommended to be provided in the immediate work area.

HYGIENE MEASURES: Handle in accordance with good industrial hygiene and safety practices. Good hygiene practices include but are not limited to wearing suitable chemical resistant gloves; eye protection; washing hands and affected skin immediately after handling, before breaks, and at the end of the workday; regularly cleaning work area and clothing; etc.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Colorless transparent crystal or white powder; monoclinic structure
Physical State:	Solid
Color:	White
Odor:	Odorless
Odor Threshold [ppm]:	No odor warning properties
pH:	slightly basic in solution pH 8.2 for 1% solution at 25°C 212 - 392 °F (100 - 200 °C) (decomposes)
Melting Point/Range:	Not applicable
Freezing Point/Range:	Decomposes before boiling
Boiling Point °C	Not flammable
Flash point:	Not flammable
Evaporation Rate (ether=1):	Not applicable
Flammability (solid, gas):	Not flammable
Lower Flammability Level (air):	Not flammable
Upper Flammability Level (air):	Not flammable
Explosion limits:	Not applicable
Vapor Pressure:	5.30e-3 (Predicted)
Water Solubility:	23% @ 20 °C 362 g/L @ 25°C
Relative Density:	2.17 g/cm3 @ 20°C
Partition Coefficient (n-octanol/water):	-4.01 to -0.809 (Predicted)
Auto-ignition Temperature:	Not flammable
Decomposition Temperature:	212 - 392 °F (100 - 200 °C)
Viscosity:	Not applicable to solids
Molecular Weight:	100.12 g/mol
Other Information:	
Molecular Formula:	KHC03
Density:	68 lbs/ft3
Bulk Density:	~68 lbs./ft3
Surface tension:	78 dyn/cm (Predicted)
Hygroscopic:	Yes
Particle Size Distribution:	<1% through 20 mesh, 50% through 80 mesh, 70% through 100 mesh, 95% through 200 mesh

POTASSIUM BICARBONATE

SDS No.: W202511

Rev Date: 01-Dec-2025

Supercedes Date: 15-Apr-2015

Rev Num: 11

SECTION 10. STABILITY AND REACTIVITY

Chemical Stability: Stable at normal temperatures and pressures. Decomposition can occur at elevated temperatures. Rapid decomposition occurs at 177°C (350°F).

Reactivity: Not reactive under normal temperatures and pressures.

Possibility of Hazardous Reactions: Temperatures above 100 °C (212 °F). Avoid contact with lime to prevent formation of corrosive potassium hydroxide (KOH).

Conditions to Avoid (e.g., static discharge, shock, or vibration): None known.

Incompatible Substances: Lime. Acids. Prolonged contact with aluminum, brass, bronze, copper, lead, tin, zinc or other alkali sensitive metals or alloys.

Hazardous Decomposition Products: Potassium oxides, Oxides of Carbon, Heating above 100 °C may cause dangerous levels of carbon dioxide gas to be present in the atmosphere, Decomposes into potassium carbonate; water; carbon dioxide >100 °C.

Hazardous Polymerization: Will not occur.

SECTION 11. TOXICOLOGICAL INFORMATION

POTENTIAL HEALTH EFFECTS:

ACUTE TOXICITY:

No acute effects expected.

Eye contact: May cause temporary mild irritation.

Skin contact: Substance does not generally irritate and is only mildly irritating to the skin.

Inhalation: May cause respiratory tract irritation.

Ingestion: No known effects. After ingestion, potassium bicarbonate rapidly dissociates in the gastric juice to yield carbonate ions (HCO₃⁻ and CO₃²⁻) and potassium ions (K⁺), and at this stage, the minor alkalinity is neutralized by the stomach acid. For this reason undissociated potassium bicarbonate is not expected to be systemically available in the body under normal handling and use conditions and the systemic action of potassium bicarbonate must be discussed for its dissociation products, carbonate and potassium ions, separately. All ions involved, are naturally occurring essential ions in human beings effectively processed and regulated in the body by natural physiological mechanism.

POTASSIUM BICARBONATE

SDS No.: W202511

Rev Date: 01-Dec-2025

Supercedes Date: 15-Apr-2015

Rev Num: 11

CHRONIC TOXICITY:

No chronic effects are known.

SIGNS AND SYMPTOMS OF EXPOSURE:

Inhalation (Breathing): Respiratory Irritation: Upper airway irritation, may cause cough, redness of mouth and upper airways.

Skin: Skin Irritation: Exposure to skin may cause redness, or irritation. This material when applied to the skin of guinea pigs did not elicit any dermal sensitization reaction.

Eye: Eye Irritation: Eye exposure may cause irritation, and redness to the eye lids, conjunctiva.

Ingestion (Swallowing): No effects identified.

Interaction with Other Chemicals Which Enhance Toxicity: None known.

GHS HEALTH HAZARDS:

There is not a GHS classification associated with this non-hazardous material.

GHS: ACUTE TOXICITY - ORAL: Category 5 - May be harmful if swallowed

TOXICITY DATA:

PRODUCT TOXICITY DATA: POTASSIUM BICARBONATE

LD50 Oral: >2825 mg/kg oral-rat LD50	LD50 Dermal: > 2000 gm/kg skin-rabbit LD50	LD50 Inhalation: > 4.88 mg/L (4.5 hr - Rat)
---	---	--

COMPONENT TOXICITY DATA: The data are from public databases sources

Component	Oral LD50	Dermal LD50	Inhalation LC50
Potassium Carbonate	1870 mg/kg (Rat)	>2000 mg/kg (Rabbit)	> 4.96 mg/l (rat/4.5 hour)

EYE IRRITATION/CORROSION: Potassium bicarbonate induced neither substantial corneal opacity nor iritis. Mean values of eye response at 24, 48 and 72 hours for conjunctival redness and chemosis were less than those triggering a classification.

SKIN IRRITATION/CORROSION: Potassium bicarbonate when applied for 24 hours under occlusion to the intact skin of rabbits induced no skin reactions.

Standard Draize (Skin): The average of the 4-, 24-, 48-, and 72-hour scores is 0.2

SKIN ABSORBENT / DERMAL ROUTE: NO

The dermal absorption of potassium bicarbonate is expected to be low due to its ionic

POTASSIUM BICARBONATE

SDS No.: W202511

Supercedes Date: 15-Apr-2015

Rev Date: 01-Dec-2025

Rev Num: 11

structure.

RESPIRATORY OR SKIN SENSITIZATION: Reliable, adequate and relevant data from a Buehler study with guinea pigs indicate that potassium bicarbonate does not induce skin sensitization. Further on, based on the structure of potassium bicarbonate, no sensitizing effects are expected.

CARCINOGENICITY: This product is not classified as a carcinogen by NTP, IARC or OSHA. There is no evidence for an intrinsic carcinogenicity of potassium bicarbonate relevant to humans obtained from the results of reliable long-term studies. Additional information from assessments carried out within the OECD work on investigation of high production volume chemicals on compounds which have a carbonate or a potassium moiety, also gave no indications on an intrinsic carcinogenic activity of potassium bicarbonate. Moreover, there is no evidence for a clastogenic or mutagenic potential of potassium bicarbonate from reliable studies on closely related read-across substances potassium carbonate or potassium chloride and in addition, based on chemistry considerations on the structure of potassium bicarbonate, no carcinogenicity is expected.

SPECIFIC TARGET ORGAN TOXICITY (Single Exposure): The substance is not classified as a specific target organ toxicant after single exposure per GHS criteria.

SPECIFIC TARGET ORGAN TOXICITY (Repeated or Prolonged Exposure): The substance is not classified as a specific target organ toxicant upon repeated exposure per GHS criteria.

INHALATION HAZARD: The product is not classified as an inhalation hazard, according to criteria of the GHS.

GERM CELL/IN-VITRO MUTAGENICITY: No studies on genetic toxicity of potassium bicarbonate are available. Reliable studies on in vitro gene mutagenicity in bacteria and in vitro cytogenicity in mammalian cells on closely related read-across substances were negative and gave no indications on an intrinsic genotoxic activity. There is no evidence for a clastogenic or mutagenic potential of potassium bicarbonate relevant to humans obtained from the results of a chromosome aberration study and bacterial mutation assays with read-across substance potassium carbonate and two mammalian cell gene mutation studies from the read-across substance potassium chloride.

REPRODUCTIVE TOXICITY: There is no evidence for an intrinsic toxicity to reproduction of potassium bicarbonate from the results of reliable developmental toxicity and teratogenicity studies on mice and rats performed with the closely related read-across substance potassium carbonate, reliable repeated dose toxicity studies with macroscopic and histological examination of the male and female reproductive organs (epididymides, testes, ovaries, and uterus) performed with potassium bicarbonate itself and available information from assessments carried out within the OECD work on investigation of high production volume chemicals on compounds which have a carbonate or a potassium moiety. Further on, based

POTASSIUM BICARBONATE

SDS No.: W202511

Supercedes Date: 15-Apr-2015

Rev Date: 01-Dec-2025

Rev Num: 11

on chemistry considerations on the structure of potassium bicarbonate and potassium bicarbonate, no toxicity to reproduction is expected.

TOXICOKINETICS: After ingestion, potassium bicarbonate rapidly dissociates in the gastric juice to yield carbonate ions (HCO_3^- and CO_3^{2-}) and potassium ions (K^+), and at this stage, the minor alkalinity is neutralized by the stomach acid. For this reason undissociated potassium bicarbonate is not expected to be systemically available in the body under normal handling and use conditions and the systemic action of potassium bicarbonate must be discussed for its dissociation products, carbonate and potassium ions, separately. All ions involved, are naturally occurring essential ions in human beings effectively processed and regulated in the body by natural physiological mechanism.

METABOLISM: Potassium is the principal intracellular cation in most body tissues. The concentration of potassium ions is essential to conduct nerve impulses in specialized tissues like brain, heart and skeletal muscle, as well as to maintain normal renal function, acid-base balance, and cellular metabolic functions. The use of compounds containing bicarbonate is showed to produce the release of CO_2 . This effect has been one of the problems of the use of potassium bicarbonate as it can cause eructation. The antacid potential of potassium bicarbonate is attained by increasing the gastrointestinal pH by neutralizing hydrochloric acid. The increase in pH results in suppression of the action of pepsin which is the enzyme that exacerbates ulceration due to the presence of acid.

BIOLOGICAL DISTRIBUTION: Potassium bicarbonate intake is done mainly in the small intestine in which approximately 90% of the potassium will be absorbed by passive diffusion. Approximately 90% of the exogenous potassium consumed is lost in the urine while the other 10% is excreted in feces and a very small amount can be found in the sweat. The excreted potassium is freely filtered by the glomerulus of the kidney.

ENDOCRINE DISRUPTOR: This product does not contain any known or suspected endocrine disruptors.

NEUROTOXICITY: Not considered a neurotoxin.

IMMUNOTOXICITY: No relevant information available.

SECTION 12. ECOLOGICAL INFORMATION

ECOTOXICITY (EC, IC, AND LC):

Aquatic Toxicity:

Potassium bicarbonate is not expected to have an intrinsic toxic activity to aquatic organisms.

Fish Toxicity:

POTASSIUM BICARBONATE

SDS No.: W202511

Rev Date: 01-Dec-2025

Supercedes Date: 15-Apr-2015

Rev Num: 11

LC50 Bluegill sunfish: 1500 mg/l (96 hr.)

LC50 Rainbow trout: 1300 mg/l (96 hr.)

Invertebrate Toxicity:

1200 mg/L 48 hour(s) EC50 Daphnia magna (practically nontoxic)

LC50 Ceriodaphnia dubia: 630 mg/L 48h

FATE AND TRANSPORT:

PERSISTENCE: This material is believed not to persist in the environment.

BIODEGRADATION: Potassium bicarbonate dissolves and dissociates immediately into K⁺ and inorganic carbon species in aquatic ecosystems including soil and sediment pore water. Both potassium and inorganic carbon are ubiquitously present in the environment. Biodegradation is not relevant because potassium bicarbonate is an inorganic substance.

BIOCONCENTRATION: This material is believed not to bioaccumulate.

BIOACCUMULATIVE POTENTIAL: Potassium bicarbonate is very soluble in water. Therefore, the substance does not accumulate in lipophilic tissues of living organisms. In aquatic and terrestrial ecosystems, potassium bicarbonate will rapidly dissociate to potassium cation and inorganic carbon species. These are naturally-occurring ions in the environment. In animal and plant organisms, the mass balance of carbonate and potassium will be regulated by physiological mechanisms to ensure appropriate cell concentrations for natural life processes.

MOBILITY IN SOIL: Due to the ionic character and the high water solubility of potassium bicarbonate, no sorption onto soil and sediment organic matter occurs.

ADDITIONAL ECOLOGICAL INFORMATION: No information available.

PBT and vPvB assessment: Potassium Bicarbonate will rapidly dissolve and dissociate in water. Therefore, potassium bicarbonate does not fulfil the P criterion. Bioaccumulation is not relevant for potassium bicarbonate, therefore, potassium bicarbonate does not meet the B criterion of the PBT criteria. The lowest reported LC50 for freshwater and marine organisms are above the cut-off value of 0.1 mg/L. Therefore, potassium bicarbonate does not meet the T criterion in the PBT assessment.

SECTION 13. DISPOSAL CONSIDERATIONS

Waste from material:

POTASSIUM BICARBONATE

SDS No.: W202511

Rev Date: 01-Dec-2025

Supercedes Date: 15-Apr-2015

Rev Num: 11

Reuse or reprocess, if possible. May be subject to disposal regulations. Measure the pH of solutions to determine disposal restrictions. Dispose in accordance with all applicable regulations.

Container Management:

Dispose of container in accordance with applicable local, regional, national, and/or international regulations. Container rinsate must be disposed of in compliance with applicable regulations.

Contaminated Material:

Contaminated packaging should be disposed of as unused product.

SECTION 14. TRANSPORT INFORMATION

LAND TRANSPORT
